Students who do not undergo regular fire service organization physicals or prefer not to initially have their own personal physician complete the Medical Release form, may complete an on-line Medical Questionnaire. Following the completion of this confidential questionnaire, it will be reviewed under the direction of MFRI's medical director.

The review will result in one of two findings:

1. the student is authorized to participate in the class;
2. additional evaluation is required by the individual's personal physician.

You should have a response to your questionnaire within 10 days.

If you are enrolled or are planning to enroll in a MFRI course requiring Medical Clearance which will begin in the next 60 days, and choose to use the Medical Clearance Questionnaire option, click the button below.
